

HJORT KNUDSEN

DINING UNIVERSE

**HJORT
KNUDSEN**
DANISH DESIGN

*Hjort Knudsen has a long experience in creating luxury comfort in living room furniture.
From this experience we have created our new Dining Universe.*

A photograph of a modern dining room. In the foreground, a light-colored upholstered chair is partially visible. Behind it, a wooden dining table is set with white plates, glasses, and silverware. A vase with two large yellow flowers sits on the table. In the background, a white wall with a grid of rectangular panels is visible, and a shelf with decorative objects is at the top.

We spend a lot of time around the dining table, whether with family, friends, or by ourselves. That's why it's important to sit comfortably...

Our upholstered dining chairs offer excellent seating comfort and even include various functionalities, such as our self-developed Ergo system. The chairs are available with or without armrests and come with different leg options.

All chairs are also available with a barstool base, perfect for a kitchen island or home bar. If you prefer wheels on your dining chairs, you can choose a 5-branch base with wheels.

Hjort Knudsen offers its usual wide range of fabrics and leathers to choose from, ensuring they fit perfectly into any home.

Our Dining Universe includes a wide range of wood table colors, from solid oak plank tables to 26 mm surfaces (need to check if this is correct) and laminate.

Get an overview of the different table shapes, wood colors, leg options and all dining chair options in this catalog.

QUALITY & KNOW-HOW

Chairs explained inside out

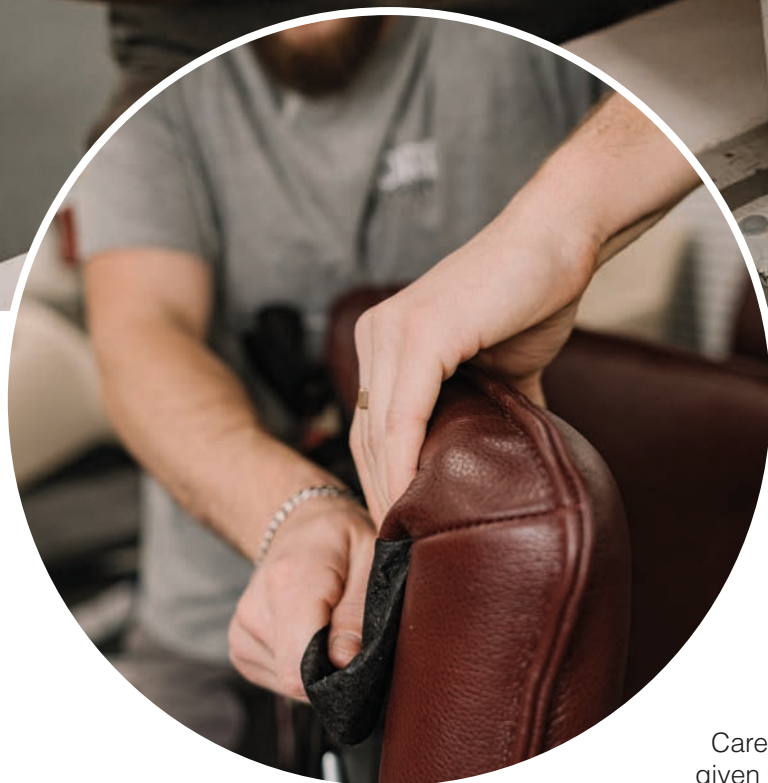

Dining chair with a molded seat, backrest and armrests

A molded upholstered chair shown in cross-section, providing insight into the interior. The chair feels relatively firm in its padding, a characteristic attributed to the way the foam is baked, but this in no way compromises the perfect seating comfort.

**Hjort Knudsen bakes all the foam used in our chairs in-house.
This ensures consistent and high quality every time.**

Glimpses from the production

Upholstering of chairs demands great attention to detail and precision, requiring skilled craftsmanship.

Careful attention is given to getting the upholstery perfectly in place before it is fastened to the underside of the chair.

Our quality control throughout the entire production process ensures consistently high quality. In this image, it is being verified that the chairs comply with the same dimensions.

STANDARD OR NOT

Our system provides the correct height

**The seat height is the sum
of the base mechanism and the seat thickness**

We offer full flexibility of the bases
across many different designs of chairs
with different thickness of seats

THEREFORE, WE OFFER DIFFERENT HEIGHTS OF BASES TO ENSURE
THAT WE ACHIEVE THE STANDARD SEAT HEIGHT

Standard seat heights are 49-50 cm. However, chairs may measure slightly more than the standard height if the chair has a softer seat, which causes you to sink a bit more than usual.

Our system automatically ensures the selection of the correct base so that the chair achieves the standard height.

You can also order a non-standard base or an adapter to achieve a different seat height than the standard seat height.

9065

Example with thicker seat thickness

9010

Example with thinner seat thickness

CHAIR CAPABILITIES

Easy Tilt – A NEW FUNCTION

Easy Tilt transforms dining comfort with 3 precise positions. Lock it for stability, or unlock for two levels of controlled bounce motion using the ergonomic handle. Fine-tune the tilt resistance beneath the seat to match your weight and preferences.

BUILD-IN FUNCTIONALITY

Ergo capability - optional

When you sit in a chair with built-in ergo, you'll experience how naturally it adapts to your movements. As you change position, the chair simply follows along – seamlessly and smoothly. The ergo mechanism is integrated between the seat and the backrest. It requires no adjustment other than responding to the way you move.

SYSTEM CHAIRS

Four possibilities - same design

9059

Dining chair **with ergo** and armrests

9039

Dining chair **with ergo** without armrests

The whole idea behind our System Chair Concept is to offer our customers the widest and most dynamic range possible. Therefore, neither design nor functionality should be a limitation.

In addition to the chairs being available with upholstery in leather and fabrics from our entire range – as well as matching bases – they are all offered both with and without ergo.

9068

Dining chair **without ergo** with armrests

DESIGN

Characteristics

9059

9039

9003

9055

Elegant chairs with soft shapes and a medium back height. The seats are molded, and the backrest and arms are filled with VP4070.

Modern chairs with sharp lines and a high backrest. The seats are made of molded foam, while the backrest and armrests are filled with VP4070.

Most of our chair designs are available with or without armrests

9025

9084

9015

9076

Beautiful, compact chairs with an open back and low backrest. These chairs are made of molded foam in the seat, backrest, and armrests.

Classic and timeless chairs with a low backrest. The seats, backrests, and armrests are made of molded foam.

All of our dining chairs are available in a wide selection of leather qualities and colors, or in over 200 different fabric options in various colors and materials. Any base from our range can be freely chosen for all chairs.

BASE FUNCTIONALITIES

**Swivel - 180° or 360° rotation
with automatic return**

On an office chair, we are used to being able to move from side to side and not sit completely still. This function that has been transferred as a standard feature to a selection of our dining chairs. The function can be ordered for our other products as well, either side to side, 180°, or fully round, i.e., 360°.

The special feature is that the chair returns to its starting position when you stand up.

SEATING ARRANGEMENTS

Benches

An upholstered bench can be an excellent solution if you want a permanently placed seating arrangement.

Like all other Hjort Knudsen chairs, benches can also be upholstered in either leather or fabric from our extensive range.

Our dining universe includes
a complete selection of dining tables

**The dining tables complement both the choice of chairs
and the surroundings in style and design.**

Material choices, colors, and finishes are typically based on individual and personal preferences and must therefore be adaptable to any personal wish.

Our Dining Universe is highly flexible in terms of material choices and colors for both dining tables and chairs, satisfying any need or preference.

A straightforward table system with virtually limitless possibilities

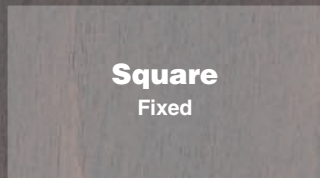

Our **Dining Table Concept** is based on four different basic shapes: "**Circle**", "**Square**", "**Semi Ellipse**", and "**Oval**". It seems simple and straightforward – and it truly is. However, as all basic shapes can be supplied with or without extension capability, and because our entire range of bases and material options are compatible, this results in over 600,000 possible combinations – so go ahead and start exploring.

WE HANDLE OUR WOOD OURSELVES

Expertise and know-how ensures the best final result

Wood is a living material and must be treated accordingly. This means it cannot simply be cut and used in our production; it must be left to dry and prepare. We prefer to manage and monitor this process ourselves to ensure we work with the best possible material in the subsequent stages.

Our wooden tables are made from oak and beech, sourced from European forests that are guided by healthy forest growth.

These types of wood are further treated or dyed in various ways to create different surfaces and expressions. This makes the tabletops more resistant to dirt while achieving the desired characteristic look.

Even in a state-of-the-art production, manual processes are essential and help catch any potential errors that may not have been noticed earlier.

Even though we produce all our furniture
on a large scale, it remains a craft.

**It requires both the right skills and the knowledge
needed to create a quality product.**

The possibilities seem *almost* endless

We offer a wide selection of different leather colors and qualities with various types of surface treatments, and our fabric palette includes over 200 different textiles in a vast range of colors and materials.

**See our wide range of fabrics and leathers
in our fabric trolleys or get advised from
the sales staf.**
